

# Program Descriptions

## Blight Extraction Engineer (B.E.E.)

This program will address the issues of blight, illegal dumping, poor food quality and the health risks associated with the injustices through farming/gardening, policy change, community awareness, block clubs and other grass root organizations.

## Mature Observing Their Health (M.O.T.H.)

This program is designed to give seniors an outlet in a calm, relaxing, safe environment

## Farmers Leading Youth (F.L.Y.)

Maintain and harvest crops to provide produce to the ANT Hole and the TIC.

## Agricultural Nourishment Team (A.N.T.)

This team serves as the managers of the garden, planting and harvesting.

## Growing New Agricultural Talent (G.N.A.T.)

This program provides participants with training on alternative growing methods for food security in the agriculture/horticulture industry

## ANT Hole

A way we give back to the community, is our stationary and mobile food stands to sell the product of the farm

## Tasting Iconic Cuisine (T.I.C.)

With the produce from the garden, Neighborhood BUG will be able to supply our café.
